Exeter Cathedral: Times can be subject to slight variation depending on events at the Cathedral. Please note this is an optional extra for those that would like the chance to ring on the second heaviest full circle ring in the world – it will be joining the monthly open practice ringing with members of the cathedral band and other visiting ringers run by the Cathedral rather than exclusively for OpUSCR.

There have been historical tensions between the church and pub with ringers using the pub carpark. To avoid issues and to save moving your car after lunch I suggest using the village carpark directly opposite the church and pub listed above

For those that can, the chosen method for the 6 bell towers in the morning will be Open University Treble Place Minor
